EE6204-SYSTEMS ANALYSIS (LEC)

New announcement from Prof EEE Su Rong

Information about Quiz 1 (Sept. 4, 20:30 - 21:30, LT1)

Dear all,

As mentioned in my lecture, Quiz 1 will be arranged on Sept. 4 (next Friday), 20:30 - 21:30 at LT1. MCQ will be given to test your knowledge about (1) graphic method; (2) Simplex method; (3) Sensitivity analysis for Simplex method. You need to make sure that you have a device to access NTULearn, and can use **Respondus LockDown Browser** to complete this assessment. Ideally, 30 mins is sufficient, if you choose right methods. However, you are given 60 mins, just in case you may encounter some technical glitches.

Next Friday, I will share the passcode at 20:29 for you to access the quiz portal. During the quiz, if you disconnect from the portal, just reconnect it and you will resume from the last stopping point. However, you only have one chance for submission. After you click the submission button, you will not be able to access the portal again. Also, if you do not submit your answers by 21:30, you will also be disconnected automatically, and only your saved answers in the portal will be marked. We will use Respondus LockDown Browser. Please make sure that you have a proper software setup for it. Your browser will be locked till the end of the quiz (9:30pm), after you start the quiz.

Besides one device for you to access NTULearn, please bring a pen, a ruler and several pieces of draft paper. No other equipment is needed.

I wish you good luck in Quiz 1 and see you all next Friday.

Cheers,

Rong
